

# Prabhanjan Sharma

Associate Engineering Manager | Full Stack Tech Lead (Next.js, Node.js)

Bengaluru, India

mprabhanjan18@gmail.com | linkedin.com/in/prabhanjan-sharma-38a48a221 | github.com/prab002

## SUMMARY

Engineer with close to 3 years of experience building web products, including a team lead role at Invennico and mentoring developers at Webknot. I run sprints, set code review and coding standards, and act as the technical contact for clients. Still hands-on in Next.js, Node.js and AWS; most recently redesigned a backend that now responds about 70% faster.

## SKILLS

**Team leadership:** Sprint planning, stand-ups, retrospectives, code review process, coding standards, mentoring, onboarding documentation

**Delivery:** Full SDLC ownership, requirement gathering, client and stakeholder communication, Agile/Scrum, progress reporting

**Architecture:** Microservices, event-driven systems, REST, GraphQL, Apache Kafka, RabbitMQ, AWS SQS, Redis

**Stack:** Next.js, React, JavaScript, Node.js, Express.js, Go, PostgreSQL, MySQL, MongoDB, AWS, Docker, GitHub Actions, Vercel

## EXPERIENCE

**Webknot Technologies**, Bengaluru | **Senior Software Developer** Oct 2025 – Present

- Mentor junior developers through code reviews and pairing, and maintain the coding standards and technical docs the team works from.
- Redesigned the backend architecture of a client product, cutting API response time by about 70% while keeping near-zero downtime.
- Work with the AI/ML team to plan and ship AI features into our backend, coordinating scope and timelines across both teams.
- Gather requirements from clients and internal stakeholders and turn them into technical plans and sprint tasks.
- Keep releases on schedule within Agile sprints through estimates, sprint commitments and regular status updates.

**Invennico TechnoLabs**, Vadodara Jun 2024 – Sep 2025

**Software Developer Team Lead** (promoted) Apr 2025 – Sep 2025

- Led the development team through the full SDLC, from planning and architecture to deployment and post-launch support.
- Ran daily stand-ups, sprint planning and retrospectives, which raised team velocity and kept releases production-ready.
- Set up CI/CD pipelines with automated deployments and made code review mandatory for every change.
- Was the main technical contact for clients: gathered requirements, proposed solutions and sent regular progress updates.

**Junior Software Developer (MERN)** Jun 2024 – Mar 2025

- Built a responsive web application with Next.js and the MERN stack, from API design to UI.
- Added server-side rendering in Next.js to improve page speed and SEO, which lifted user retention.
- Worked with designers and the product team to match features to business goals and ship on time.

**Adrixus Tech Studio**, Vadodara | **Software Developer Intern (MERN)** Dec 2023 – Jun 2024

- Built reusable React components with Styled Components and documented them in Storybook for the team.
- Wrote REST APIs with Node.js, Express.js and MongoDB and connected them to frontend modules.

## EDUCATION

**B.Tech, Computer Science (Artificial Intelligence)**, ITM SLS Baroda University, Vadodara 2020 – 2024

## ACHIEVEMENTS

- 1st place, Codeathon programming competition
- Wrote the internal workflow and best-practice docs used to onboard new developers
- Write technical articles on Medium about Next.js, API design, performance and system design
