

Prabhanjan Sharma

Founding Engineer | Full Stack (Next.js, Node.js, AWS) | Idea to production

Bengaluru, India (IST, UTC+5:30) | Open to remote

mprabhanjan18@gmail.com | linkedin.com/in/prabhanjan-sharma-38a48a221 | github.com/prab002

SUMMARY

Full-stack engineer who has owned products end to end: talking to clients, designing the architecture, writing frontend and backend, setting up CI/CD and supporting the product after launch. Close to 3 years across Next.js, Node.js, event-driven backends and AWS, including leading a small team and shipping AI features with an ML team. Looking to join an early-stage product company as one of its first engineers. I have also built and launched four products on my own, including the paid apps Traders Zone and Free Mac.

PROJECTS

- **Traders Zone** | traders-zone.in: AI trading journal for crypto traders. Users upload their trades; it checks 12 trading habits against that history and reports win rate, sample size and money made or lost per habit. Chat with your own record in English, Hindi or Hinglish. Covers 1,529 Binance spot and perpetual markets without ever asking for exchange API keys. Free, Pro and Max plans.
- **Free Mac** | free-mac.online: Mac disk cleaner that maps the whole drive, shows what is using space and clears it. Runs on macOS 10.15+ on Apple Silicon and Intel; 11.4 MB download, no account needed. Free scan, with a paid licence key that unlocks cleaning.
- **AI Skill Up** | aiskillup.online: AI skills learning site with paid access delivered through licence keys, plus a technical blog.
- **SoundCraft** | soundcraft.online

SKILLS

Product engineering: Next.js (SSR, SSG), React, Node.js, Express.js, Go, REST APIs, GraphQL, Firebase

Data and infrastructure: PostgreSQL, MySQL, MongoDB, Redis, Apache Kafka, RabbitMQ, AWS SQS, AWS, Docker, Vercel

Shipping: CI/CD with GitHub Actions, automated deployments, code review, technical documentation

Beyond code: Requirement gathering, client communication, sprint planning, mentoring

EXPERIENCE

Webknot Technologies, Bengaluru | Senior Software Developer Oct 2025 – Present

- Redesigned a client product's backend architecture, cutting API response time by about 70% with near-zero downtime.
- Shipped AI-driven features into production by working with the ML team on the backend side.
- Reworked the product's UI and UX to make core flows simpler and faster.
- Take requirements straight from clients and turn them into designs, tickets and releases.
- Mentor junior developers and keep code quality up through reviews and written standards.

Invennico TechnoLabs, Vadodara Jun 2024 – Sep 2025

Software Developer Team Lead (promoted) Apr 2025 – Sep 2025

- Took client projects from the first requirements call through architecture, build, deployment and post-launch support.
- Set up CI/CD pipelines and automated deployments from scratch, with code review on every change.
- Led the team's sprints: planning, stand-ups and retrospectives.

Junior Software Developer (MERN) Jun 2024 – Mar 2025

- Built a web application from zero with Next.js, React, Node.js, Express.js and MongoDB.
- Added server-side rendering in Next.js for speed and SEO, which lifted user retention.
- Handled authentication with JWT, file storage on AWS S3 and deployment on Vercel.

Adrixus Tech Studio, Vadodara | Software Developer Intern (MERN) Dec 2023 – Jun 2024

- Built reusable React components and REST APIs with Node.js, Express.js and MongoDB, documented in Storybook.

EDUCATION

B.Tech, Computer Science (Artificial Intelligence), ITM SLS Baroda University, Vadodara 2020 – 2024

ACHIEVEMENTS

- 1st place, Codeathon programming competition
- Technical writer on Medium: Next.js, API design and system design
